XRP Faucets

These parallel XRP Ledger test networks provide platforms for testing changes to the XRP Ledger and software built on it, without using real funds.

These funds are intended for **testing** only. Test networks' ledger history and balances are reset as necessary. Devnets may be reset without warning.

All balances and XRP on these networks are separate from Mainnet. As a precaution, do not use the Testnet or Devnet credentials on the Mainnet.

Choose Network:

- **Testnet:** Mainnet-like network for testing applications.
- **Devnet:** Preview of upcoming amendments.
- **Xahau-Testnet:** Hooks (L1 smart contracts) enabled Xahau testnet.

Generate Testnet credentials

Testnet Servers

```

// WebSocket
wss://s.altnet.rippletest.net:51233/

// JSON-RPC
https://s.altnet.rippletest.net:51234/
            
```

Devnet Servers

```

// WebSocket
wss://s.devnet.rippletest.net:51233/

// JSON-RPC
https://s.devnet.rippletest.net:51234/
            
```

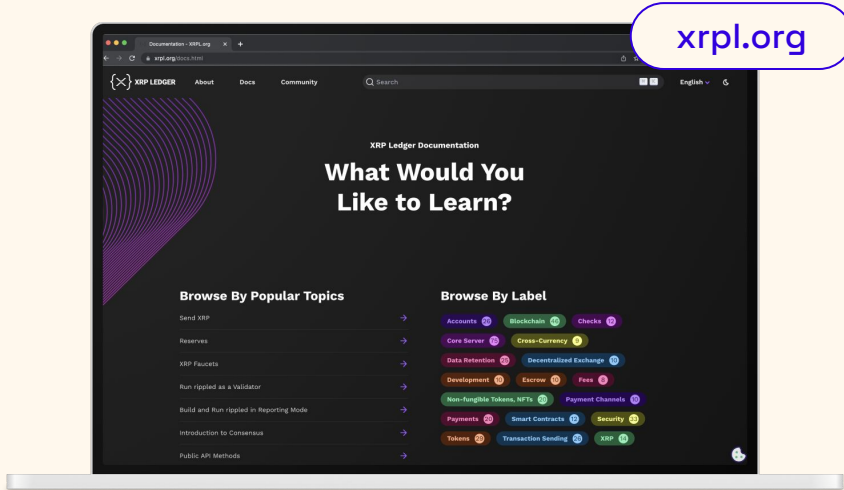

Xahau-Testnet Servers

```

// WebSocket
wss://xahau-test.net/

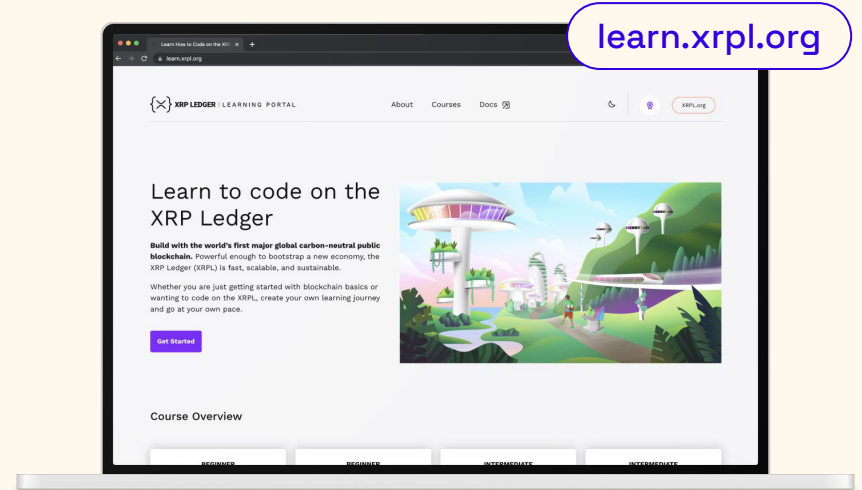

// JSON-RPC
https://xahau-test.net/
            
```
